CATALOG OF LARGE TYPE SHORT-RUN PUBLICATIONS

June 1, 1970

During the past year, a number of large type books produced by the short-run, direct-image process have been published by the Printing House in accordance with the attached covering statement. In many cases, all copies of the first printing were taken by the original customer; in other cases there is still stock on hand; and in still other cases many books are in process of production, and it would be possible to increase the size of the first edition if additional orders are received before presstime. The notations given in the right-hand column of the following listings should therefore be noted:

1. OS--means out of stock. However, since the 2 copies of the original ink-print publisher's edition are in hand, as well as permissions (in most cases), a new printing could be made, again based on an edition of 5 or more copies (as seems reasonable), and again with a required order for only 1 copy. (Note that the original printing plates--made on paper--cannot be successfully stored from printing to printing, and must be reshot from the original ink-print copy for each reprint.)

2. IP--mean in process, i.e., the original order is still in production, and it may still be possible to include orders for additional copies in this printing.

3. The numbers 2 through 5 indicated finished copies on hand and in stock available for immediate delivery.

NOTE: When sending in orders, be sure to include the CATALOG NUMBER of each title. (This number is listed right after the number of volumes and pages of each title, and is underscored.)
